

Linux System Administrator Wanted

The Parelli method allows horse lovers at all levels and disciplines to achieve: success without force, partnership without dominance, teamwork without fear, willingness without intimidation, and harmony without coercion.

Founded in 1981 by lifelong horseman and teacher Pat Parelli, the Parelli Program combines common sense psychology and communication. Unlike many training programs, the Parelli method teaches the human, not the horse. Early on, Pat realized that horses already had all the skills they needed to thrive and relate with their kind. It was adding the human element that complicated things.

We are looking for a creative, motivated and energetic individual who has 1-2 years of Network/System Administrator experience in Linux. This job is located in Pagosa Springs, Co (must be willing to relocate).

Your primary responsibilities and duties would include the following, (Other duties may be assigned):

- Hardware monitoring of server equipment, including our TSM backup system and tape management.
- Implement new systems as projects get rolled out. Coordinate upgrades of system software, and monitor security on the systems.
- Work with a group of programmers on hardware design and streamlining for existing projects.
- Maintain network connectivity for the cooperate office in some wiring and network related configurations. As well as trouble shoot issues that might arise in our remote offices (FL, UK, AU). Also willingness to travel to those offices 2 - 4 weeks a year.

Our Ideal Candidate:

- Has a strong understanding of Redhat or variant Linux.
- Is familiar with Redhat Linux Installs and IBM hardware, and upgrading through RHN.
- Is willing to do what it takes to get the job done.
- Is a team player, and can work inside tight deadlines.
- Has strong verbal communication skills.
- Is familiar with networking concepts and has a desire to learn networking as well as a deeper understanding of Linux.

Please send cover letter and resume to be considered for this position.
